Postpartum Wellness & Family Support

“Care for Mom. Share the Care. Capture the Moments”

Sriyaanchita S - 241701057

Gokul Krishna I S - 241701016

CURRENT SCENARIO & SYSTEM-LEVEL GAP

Current Scenario

- New mothers have limited personal time.
- Baby-care creates a continuous mental load.
- Parents need to coordinate childcare.
- Mom's wellbeing can get overlooked.

System-Level Gap

- Wellness, baby care and family support exist separately.
- No single space connects Mom + Dad + Baby.
- Baby-care information and memories are not organized together.

One family, many responsibilities, no single support space.

FIVE FRICTION POINTS

LESS PERSONAL TIME

Mom struggles to make time for herself.

MENTAL LOAD

Too many baby-care details to remember.

SUPPORT GAP

Partners may not know when mom needs support.

SHARED CARE

Childcare responsibilities are difficult to coordinate.

LOST MOMENTS

Milestones and memories can get scattered.

From mental load to meaningful support.

EMPATHY MAP

NAME: **VEDHAPRIYA**

SAYS

- "My biggest challenge is emotional stress."
- Experiences stress sometimes.
- Uses rest or sleep to manage stress.
- Wants help managing stress and anger.
- Wants accurate, personalized recommendations.

THINKS

- "I need better ways to manage my emotions."
- "I want reliable professional guidance."
- "My partner should understand when I need support."
- "My wellness information should be handled carefully."
- "The app should help me manage my mental wellbeing."

DOES

- Has a child above 2 years old.
- Tracks growth milestones.
- Gets around 30–60 minutes of personal time.
- Uses rest/sleep to cope with stress.
- Has a quite involved partner/family.
- Is open to counseling and professional support.

FEELS

- Emotionally stressed.
- Occasionally overwhelmed.
- Tired and in need of rest.
- Supported by partner/family.
- Reassured by professional information.
- Wants better control over stress and anger.

GAIN POINTS

- Mood/stress tracking.
- Growth milestone tracking.
- Stress-management guidance.
- Breathing and relaxation exercises.
- Counseling support.
- Professional mental-health support.
- Personalized recommendations.
- Partner/family support features.

PAIN POINTS

- Emotional stress.
- Difficulty managing anger and stress.
- Need for reliable information.
- Need for continued emotional support.
- Balancing personal wellbeing with parenting responsibilities.

PEOPLE

The three people MamaMind is designed around.

MOTHER

- WELLNESS
- SELF-CARE
- COMMUNITY
- SUPPORT

FATHER / PARTNER

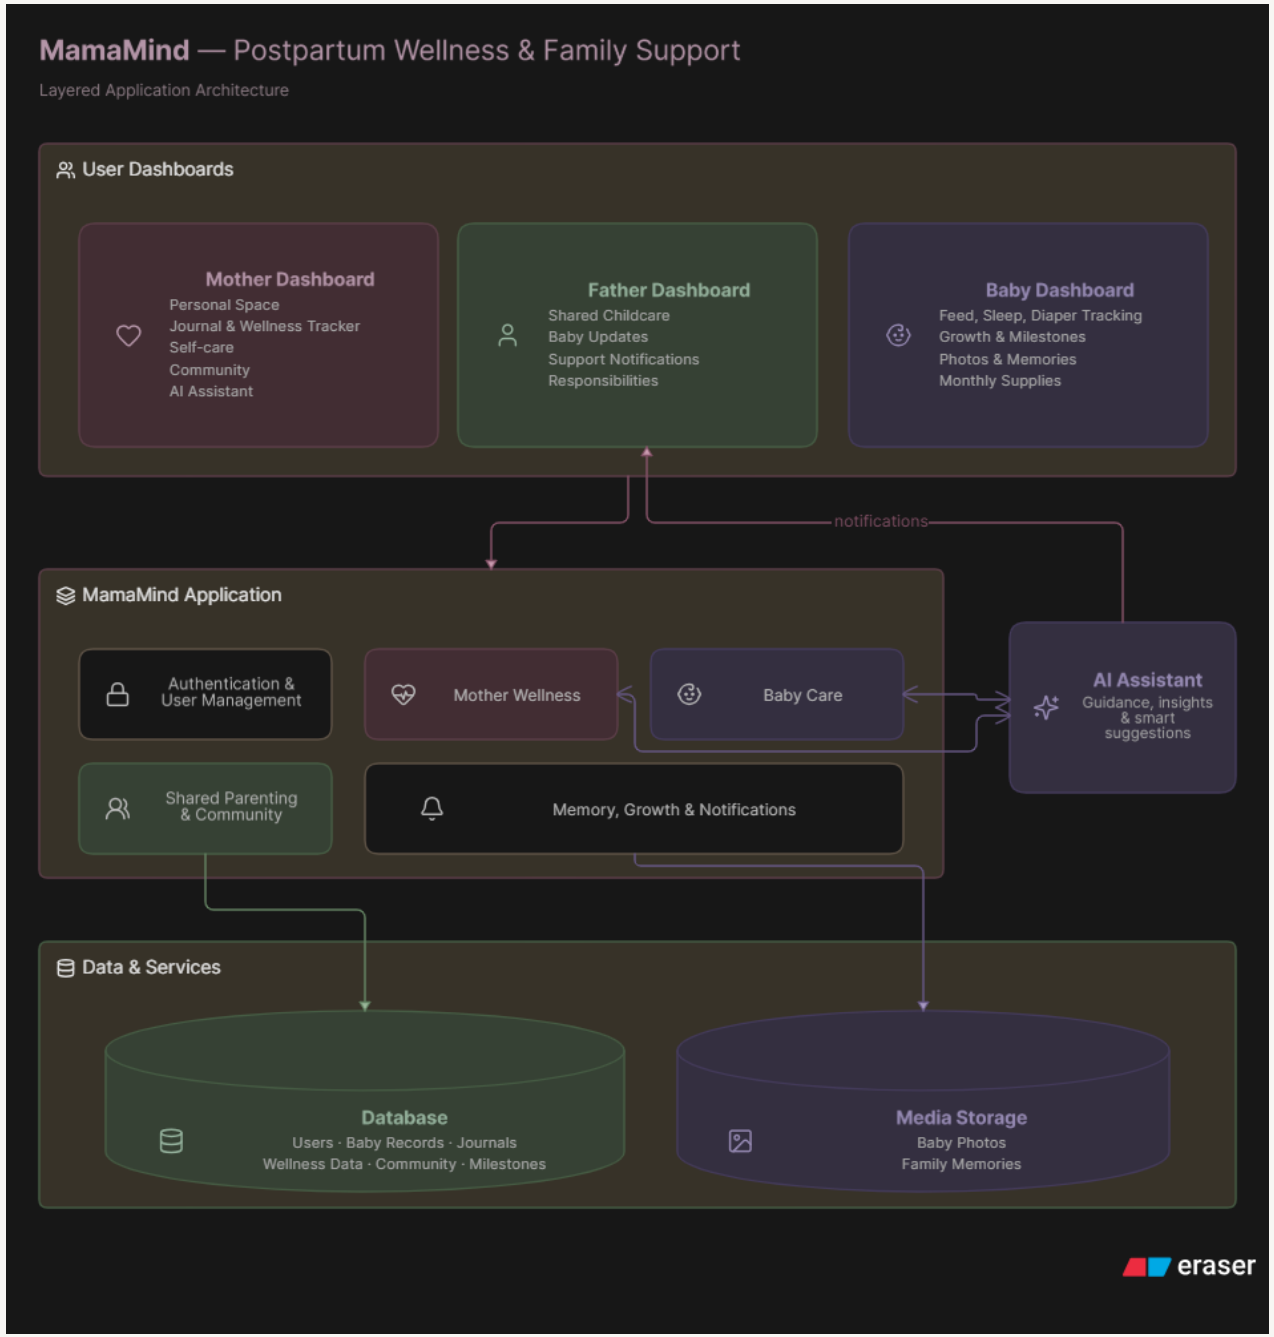

- CHILDCARE
- SHARED RESPONSIBILITY
- SUPPORT

BABY

- CARE
- GROWTH
- MILESTONES
- MEMORIES

Designed for Mom. Connected to the whole family.

ARCHITECTURE DIAGRAM

MamaMind uses a layered architecture that connects user dashboards, core application features, and backend data services. It supports personalized mother, father, and baby experiences, with an AI assistant providing smart guidance and recommendations. The system securely manages wellness data, baby records, notifications, and family memories in one connected platform.

OBJECTIVES

01	SUPPORT MOM	Create time for self-care and positivity.
02	REDUCE MENTAL LOAD	Organize everyday baby-care information.
03	SHARE RESPONSIBILITY	Connect mother and father in childcare.
04	BUILD CONNECTION	Create a supportive mom community.
05	PRESERVE MEMORIES	Track milestones, growth and baby moments.

Wellbeing + Shared Care + Connection

CONSTRAINTS

Design boundaries MamaMind must respect.

SIMPLICITY

Parents have limited time and attention.

PRIVACY

Mood and personal information must remain under user control.

FLEXIBILITY

Baby routines are unpredictable.

EMOTIONAL SAFETY

The app should feel positive, never judgmental.

Support without pressure.

SCOPE

MOTHER

Self-care • Mood • Positive activities • Community

FATHER / PARTNER

Shared childcare • Support • Notifications

BABY

Milk • Sleep • Diaper • Care tracking

BABY JOURNEY

Growth • Milestones • Monthly photos • Supplies • Memories

Care → Connect → Capture

EXPERIENCE CONCEPT

CHECK

See Mom's wellness and baby's latest activities.

RECORD

Track baby-care activities.

RECHARGE

Mom spends intentional time for herself.

SHARE

Parents coordinate care and optional support.

CAPTURE

Save milestones and memories.

Less to remember. More to experience.

RESOURCES

RESEARCH

- MOTHER & PARENT INTERVIEWS
- SURVEYS
- CASE STUDIES

DESIGN

- FIGMA
- USER JOURNEY
- MOBILE PROTOTYPE

VALIDATION

- USABILITY TESTING
- USER FEEDBACK
- ITERATION

Research → Design → Test → Improve

HOW MIGHT WE...

Help new mothers create time for themselves, reduce the mental load of baby care, share responsibilities with their partners, and preserve meaningful family moments?

MAMAMIND

- Care for mom
- Share the care
- Capture the Moments

"When Mom is supported, the whole family grows together."
